

StableTable® OnTop™ Natural Woods

StableTable® OnTop™ Natural Woods is a range of carefully selected tops that add an extra touch to any design. They are all specially selected to adhere to the highest quality specifications. Available in most common sizes they will help you create a more exclusive ambience.

The tops have a 30mm chipboard core and 5mm thick solid wood layers on the top and sides and oak on the bottom side.

The Oak 3-layer top has a core of rod glued oak with 5 mm upper and bottom side in oak.

The Barrique range is produced from reclaimed original wine barrels with all stains and markings from use in the wine production. This range has a slightly uneven surface created by the shape of the original staves from the barrique and will by nature vary in colour and markings just like the barrique they are made of.
