

## StableTable® - Table base size guide

StableTable are unique patented self-stabilising table bases for professional use in the hospitality industry, hospitals, schools, offices and public spaces. We offer a complete range of table bases and table tops: different heights, sizes, shapes colours and materials. For in- and outdoor use all year round.

Guide for selecting the correct StableTable® table base

1. Choose table top shape
2. Choose table top size
3. Choose the required table height
4. Choose design
  - Classic - for use both in- and outdoors under normal conditions
  - Extreme - for use in all areas including close to salt water
  - Nouveua - Classic Bistro style for use in- and outdoors under normal conditions
  - Rise - Modern design with clean cut cross-legs for in- and outdoors use

If the size of your table top falls between two different table base sizes, both sizes will work but we recommend the smaller size.

Work from left to right in the grid below.

x = colour code

<sup>2</sup> = up to 110cm diameter

For tops longer than 120cm, you have two options. You can choose two or more of our fixed leg CS-072-57-x which follows the Classic design or you can use two or more of one of the 64 or 57 cm legs above.

<sup>3</sup>We always recommend that you attach the base to the top so that the legs follow the diagonal of the top. If you choose to fix your tops to the base with the legs in cross direction instead of in diagonal direction you need to use a one size smaller base than recommended for square tops otherwise the legs will be slightly wider than the top.
